Languages

HTML (good), CSS (good), PHP (basic), SQL (very good) and T-SQL (good).

Database Management Systems

Microsoft SQL Server 2000 (professional use), MySQL (personal use).

Content Management Systems

Wordpress (personal use), other PHP/MySQL-based CMSs like Mambo, Joomla, XOOPS.

Other

Hyperion Intelligence Suite, for Business Intelligence/Business Process Management solutions (<http://www.hyperion.com>).

Executrack ETWeb, Human Resource Management web-based software: I worked on the reporting architecture, developing new report based on Blulink's customization and modifying some existing reports (<http://www.executrack.com>).

Language skills

Italian: Mother tongue.

English: Fluent.

Spanish: Very basic skills.

Work Experiences

2000 – 2003

Summer jobs in local mechanical and chemical industries.

October 2004 – March 2005

Part-time collaboration at the Secretary Office of Mechanical Engineering Faculty's Dean.

June – July 2005

Internship: worked at Blulink (<http://www.blulink.com>), Total Quality Management software house.

I developed a set of standard Business Performance Management dashboards with Total Quality related Key Performance Indicators. My Bachelor's thesis is based on this project.

September 2005 – February 2007

Full-time and part-time collaboration as Business Performance Management and reporting specialist at Blulink. I worked on some Business Performance Management projects and developed new reports for Executrack's ETWeb human resource management software.

September 2005 – present

Website updates, Chorus of the University of Modena and Reggio Emilia.

Publications

D. Tarasconi, "*An overview on structure and evolution of Free/Libre and Open Source Software development*".

Available online at <http://www.davidetasconi.net>).

Short essay submitted for Network Economics and Complexity Economics exam.

Interests

I'm focused on economical and organizational impacts of technology, especially network and Web related ones: working experiences on fields such decision support systems, business performance management and human resource management gave me an insight of the importance of process management and design.

I'm interested in open source business models: I believe the "open" and collaborative approach will be a key driver to foster innovation through different types of industries and institutions, especially in regard to the Italian fragmented industrial world, almost completely held by SMEs.

I'm also interested in environmental issues and in the *so-called* sustainable progress: I believe that if we want to talk about economical progress and innovation we can't ignore that kind of problems.

Interests keywords

Web, network economics, social networks, open source, business processes, decision support systems, knowledge management, business intelligence, software design, software development, innovation management, collaboration, information society, complex networks, complex evolving systems, social network analysis, environment.

Extra curricular interests and miscellaneous facts

I love basketball, I play since a child and follow Italian, European and NBA championships: I'm also a fitness fan, I like to keep myself in a good shape.

Music junky (from jazz to electronica), (very) beginner bass player.

Interested in design and art: I like to draw comics characters.

I read a lot, from science fiction to business books and also comics.

Internet addict, blogger.

I'm planning an Erasmus semester abroad in Nicosia, Cyprus, starting on January 2008.
